

THE KITE AND WINDSURFING NAVIGATOR

- A brief instruction guide -

1. Download

A W-LAN connection is recommended for downloading the App and its content (up to 400 MB!) For normal use UMTS /Edge are no problem.

2. Free example region

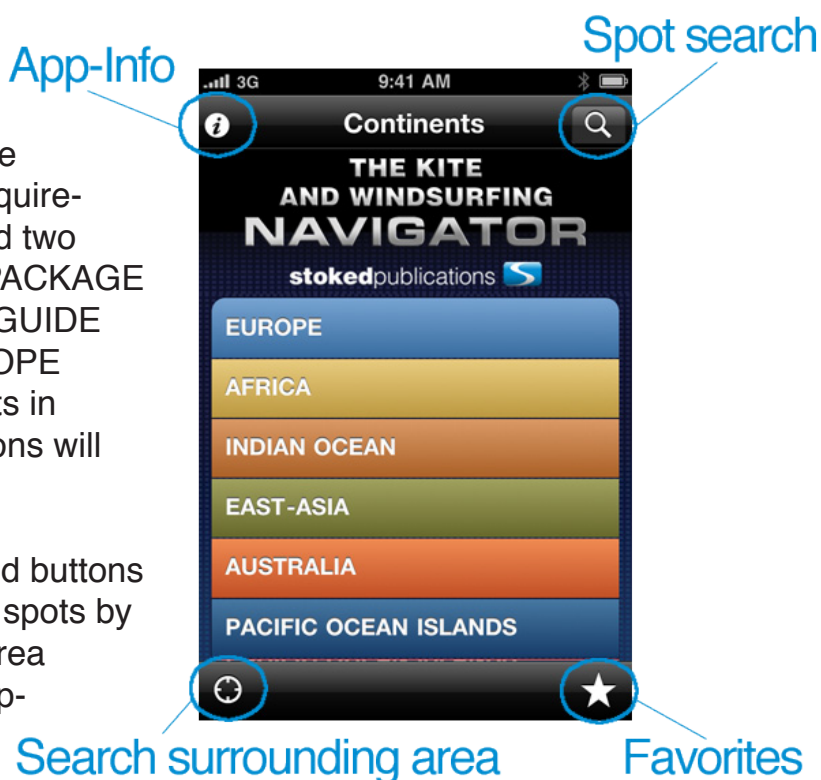

When first opening the App you'll automatically download a free example region: "Cape Town, South Africa" for you to explore its potential and understand how it works.

3. Start

Here you can select the continent of your choice. There are 200 regions in 9 continental chapters available via in App purchase. You can download single regions, a whole country or a continent to suit your requirements. At the end of the list you'll find two special offers: the WORLD GUIDE PACKAGE (includes all regions of the WORLD GUIDE with over 1.250 spots) and the EUROPE PACKAGE (includes over 1.650 spots in Europe). Clicking the Package Buttons will show detailed content lists.

In the corners of the display you'll find buttons for special functions such as picking spots by name, searching your surrounding area (see 6.) or select your favourites. App-Info will give an explanation for all the functions, symbols and graphics used in the App.

4. Spot list / Spot info

When you select a region, a list opens with the local spots displaying symbols showing the spot characteristics.

By clicking on a spot you will receive the exact location in a Google Map.

The button “show all spots on the map” displays a Google Map with all spots of the region. (See below)

The button  takes you to all the info texts for the region (Intro/ Pros & Cons/spot info/Kite- and Windsurf conditions/travel info). These texts all meet the legendary KITE AND WINDSURFING GUIDES.

Furthermore you also have access to the embedded WORLDWIDE TRAVEL DIRECTORY with all the contact addresses in the region.

World Wide Travel Directory

5. Map

The overview map shows you all the spots of the region in Google Maps. The coloured pins denote the spot characteristics (see legend in App-info).

By clicking on the pin you can select the spot. You now have three options:

1. Wind forecast
2. Spot info
3. Add spot to favorites (see 6 below.)

In addition a button marked “spots with best wind forecast” is displayed below the map. The number shows how many spots in the region have a best wind forecast for the next three days. Click on the button to display these spots in the map.

Wind alert

6. Special-Features:

Search surrounding area:

In this search option all the spots in close vicinity will be shown (pre-set radius: 100 km/ you can change this in the set-up menu of your iPhone).

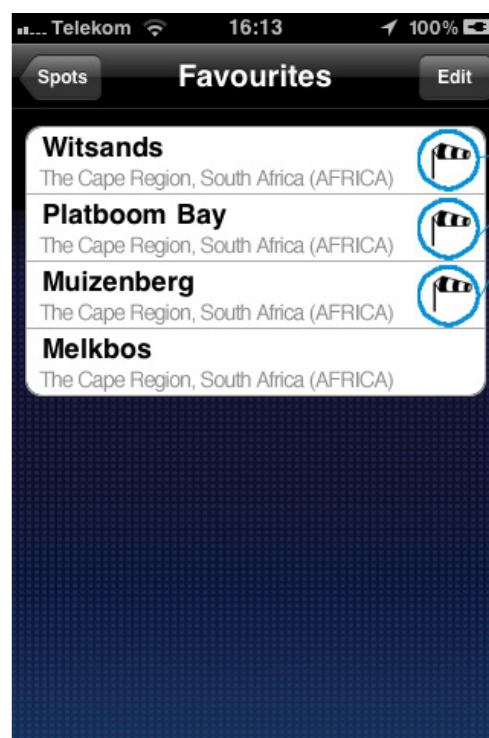

Spots in regions you have not purchased will be shown greyed out.

Favorites:

This is where your chosen favourite spots are listed.

Spots with a wind sock have a forecast for best winds within the next three days.

7. FAQ

If I reinstall the app or change my device, do I have to purchase content I have already bought previously?

iTunes saves your previous transactions. There will be no additional cost to your account when you download the App and/or your previous content (E.G. after changing devices). It will ask you if you want to purchase the content again but in the next step you will receive the info that the content is free to download.

Enjoy the ride and keep getting stoked!
